

Harshit Agrawal

+91-6367814054 | Full-Stack Developer | Email: aharshit042@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full-Stack Developer with hands-on experience building scalable web and AI- powered applications using React.js, Node.js, and LLM-based systems. Seeking a Software Engineer (SDE-1) or Full-Stack Developer role where I can contribute to product development, system design, and performance-driven engineering.

EXPERIENCE

Software Engineer – TarqaAI Solutions (Jaipur) March 2026 – Present

- Assisted in developing AI-driven internal tools and automation workflows to improve operational efficiency.
- Developed frontend and backend features using React.js, Node.js, Express.js, and REST APIs.
- Integrated third-party APIs, debugged application issues, and optimized application performance for scalable workflows.
- Collaborated in a startup environment to build productivity-focused solutions and improve system reliability.

Software Engineer Intern – Pratham Software Pvt. Ltd. (Jaipur) May 2025 – Aug 2025

- Developed and maintained scalable full-stack web applications using React.js, Node.js, and Express.js within an Agile/Scrum environment, contributing to production features used by live clients.
- Designed and implemented RESTful APIs with Node.js and Express.js for efficient client-server communication, ensuring smooth data flow across services.
- Worked with MongoDB and SQL databases to design schemas, write optimized queries, and improve data retrieval performance for high-traffic endpoints.
- Debugged and optimized React.js frontend and Node.js backend components, reducing average page load time by ~25% and improving overall system stability

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C++

Frontend: React.js, Tailwind CSS, HTML

Backend: Node.js, Express.js, REST API Development, JWT Authentication, WebSockets, Redis

AI/ML Tools: OpenAI API, Whisper, Ollama, Pyannote, LLM Integration

Databases: MongoDB, SQL, PostgreSQL

Developer Tools: Git, GitHub, Docker, FFmpeg, Postman, Vercel, Render

PROJECTS

TenderSathi — AI-Powered Tender Aggregation Platform | Python, PostgreSQL, React.js, REST APIs, Cron Jobs

- Built multithreaded Python scraping pipelines for automated tender collection, structured parsing, and data normalization.
- Optimized PostgreSQL database operations and implemented connection pooling for efficient high-volume data handling.
- Automated periodic tender updates using cron jobs and deployment workflows for near real-time data synchronization.
- Improved scraper reliability through debugging, retry mechanisms, and performance optimization techniques.

PSAI – Enterprise Conversational AI Platform | React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Engineered full-stack AI chat platform with real-time conversations, JWT authentication, and session management for secure, scalable enterprise use.
- Optimized REST APIs and React UI, boosting UI responsiveness ~30% and message processing by ~25% via efficient state management and backend throttling.

AI-Powered Podcast Editor | React.js, TypeScript, Python (Flask), FFmpeg, Whisper, Pyannote

- Developed end-to-end editor with AI transcription (Whisper), speaker diarization (Pyannote), and silence detection, slashing manual editing time.
- Scaled Flask REST APIs with async processing and Redis caching to handle large audio/video files efficiently.
- Reduced manual editing time by ~65% via FFmpeg media optimization pipeline, improving audio/video output quality at scale.

EDUCATION

Bachelor of Technology in Computer Science, Government Engineering College, Bharatpur — July 2022–May 2026
CGPA: 8.57/10 (RTU, Kota)

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure (OCI) 2025 – Certified AI Foundations Associate – Sept 2025
- Participated in an industry-level hackathon organized by Pratham Software, Jaipur – June 2025
